

Data Modernization with Neal Analytics

DATA MODERNIZATION IN A MONTH (DMIM) WITH NEAL ANALYTICS

Modernize data

Leverage a fully functional data platform in just 30 days

Begin your data modernization journey with a cloud data platform on Azure in just a month

Migrating to Azure doesn't need to be complicated. Your organization can scale out a modern data platform in 30 days or less with help from Neal Analytics and Microsoft resources.

Data modernization in a month (DMIM) program

Neal's DMIM program leverages predefined templates and resources provided by Microsoft to enable Neal engineers to rapidly scale out a modern data platform. Once built, Neal will work to tailor it to your specific needs and ensure functionality.

The DMIM program also has funding available for qualified organizations. [Contact us](#) to learn more.

Cost: Varies based on project size & funding availability

According to Gartner, **75% of databases will be in the cloud by 2022**

Gartner goes on to add that the main driver for migrating data to the cloud is to **capture superior analytics** and to take advantage of the **pay as you go model**.

This program is designed to help your organization seize the benefits of an Azure-based data platform within 30 days by leveraging pre-defined architectures and Neal expertise.

Data Modernization With Neal Analytics

DATA MODERNIZATION IN A MONTH (DMIM)

At the conclusion of 30 days, your organization will come away equipped with a fully functional data platform that will provide the benefits provided by Azure's efficient, flexible, and secure infrastructure.

The data platform will:

- Leverage cost-effective, modern data solutions & infrastructure
- Offer built in geo-redundancy & high availability architectures
- Provide fast, globally available data storage and analytics tooling
- Auto scale on-demand resources up and down to constantly right-size the data platform
- Offer pay-as-you-go pricing
- Leverage Microsoft and Neal's extensive library of pre-built data connectors to connect with disparate data sources
- Provide a target for migrating data from on-premises databases

Program Expected Outcomes

Why do we need this program?

Organizations with a large or complex data platform have hesitated to migrate to the cloud due to the risk, cost, and lengthy timelines associated with migrating to the cloud. The DMIM program helps address these concerns by providing organizations with a low-risk, quick, and inexpensive way to begin their data modernization journey.

Who should apply?

This program is perfect for organizations who have either already decided to migrate to the cloud and are looking for a good place to start, or organizations considering making the move and would like to leverage a low-cost, yet fully functional, data platform as a proof of concept.

Why Neal Analytics?

Neal Analytics is a cloud, data, and AI Microsoft Gold consulting partner supporting data-driven transformation initiatives from data strategy to solution design, architecture, development, operationalization, and support. Our expertise spans across migration and modernization, data science, AI/ML, IoT, edge computing, BI, application development, and RPA.

Our partnership with Microsoft and use of in-house Agile methodologies has enabled us to launch our DMIM program, making us one of few organizations who can stand up a modern data platform on Azure in 30 days or less.
